

Rio Vista POA

Culvert Information

Dear Rio Vista POA Owners & Builders,

The County does not install any culverts on new home construction builds. (Builders responsibility).

In the Patton Village section of Rio Vista, the builder is required to obtain a permit from Patton Village.

If an individual wants a culvert the County will do the installation.

The builder is required to contact the County. They will come out and tell the contractor what size has to be used and how much crushed concrete they need to purchase. Once the culvert is in place the County will inspect this prior to it being covered up.

If the builder fails to contact the County and adhere to these rules and guidelines, the County will not reset any undersized or incorrectly installed culverts.

If a culvert has dirt instead of crushed concrete before the driveway is poured it is an illegal installation.
